PROFESSIONAL SUMMARY

Junior Software Engineer and Technical Support Specialist with hands-on experience building full-stack web and desktop applications. Proficient in PHP, Laravel, React, CodeIgniter, C#, and MySQL. Experienced in deploying live web systems, resolving database and server synchronization issues, and performing game Quality Assurance (QA). Detail-oriented troubleshooter with a strong track record of translating complex technical issues into clear client solutions.

SKILLS

Programming Languages: PHP, JavaScript, C#, Python, Java, C++, HTML, CSS, SQL

Frameworks and Technologies: Laravel, React.js, CodeIgniter 4, .NET Core / Windows Forms, MySQL, Tailwind CSS, Bootstrap

Core Concepts: Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), Relational Database Management (RDBMS), API Integration, Game QA & Testing, Web Security

Tools and Platforms: Git, GitHub, VS Code, Figma, Vercel, Cloudflare, Composer

AI Tools: Claude, Cursor, ChatGPT — experienced in utilizing AI tools to accelerate development and improve productivity

Additional Skills: UI/UX Design, Problem Solving, Team Collaboration, Technical Support, Communication, Adaptability

EXPERIENCE

Technical Support & Full-Stack Developer (Intern)

One Health (Web-Based Immunization System) • August 2025 – Present • Hybrid

- Designed and co-developed the full-stack architecture of a web-based immunization platform using Laravel, React.js, and MySQL, digitizing over 10,000 health records.
- Successfully launched and deployed the system to production at **onehealth.my**, managing server configurations and database scaling.
- Provided Level 2 post-launch technical support, resolving 50+ client tickets weekly regarding MySQL database sync issues and UI glitches.
- Implemented frontend performance updates that reduced page load times by 20% and improved database query efficiency.

Game QA Tester

Golden Tides (Psychedelic Games) • 2025 – 2026 • Remote

- Executed playtesting and functional Quality Assurance (QA) for a PC adventure MOBA, identifying and documenting 100+ critical bugs.
- Isolated gameplay glitches, network synchronization delays, and hardware compatibility issues, writing detailed step-by-step reproduction reports.
- Collaborated closely with game developer teams to verify bug fixes, execute regression tests, and ensure game patch stability.

PROJECTS

Nihituwan (Property and Unit Management System)

Tech Stack: PHP, CodeIgniter 4, MySQL, Composer, Bootstrap

- Developed a web system managing real estate workflows, tenant records, and secure login portals, sharpening database management skills.
- Implemented secure user workflows including registration, login, email verification, and role-based access controls (Admin vs. Tenant).
- Structured a secure backend MVC architecture following CodeIgniter 4 standards and managed dependencies with Composer.

Puhon Retail Management (Desktop POS & Inventory System)

Tech Stack: C#, Windows Forms, .NET Framework

- Designed and coded an inventory management and Point of Sale (POS) system, developing a strong familiarity with billing and ordering workflows.
- Integrated local database operations to allow secure product catalog lookups, billing calculations, and inventory updates.
- Designed an intuitive UI that reduced checkout processing time for retail operators.

Black Ink (Art Shop Ordering and Inventory Website)

Tech Stack: HTML, CSS, JavaScript

- Built a responsive frontend web application for listing art supplies and tracking shop orders during initial web development studies.
- Designed clean product catalog listings, shopping cart updates, and item search filters.

EDUCATION

Bachelor of Science in Information Technology

Cavite State University – Silang Campus • Expected September 2026

- Coursework: Software Engineering, Database Systems, Computer Networks, Object-Oriented Programming (OOP)

Senior High School Graduate

Olivarez College • Graduated 2022
