PROFESSIONAL SUMMARY

Junior Software Engineer with hands-on experience building full-stack web and desktop applications. Proficient in PHP, Laravel, React, CodeIgniter, C#, and MySQL. Experienced in deploying live web systems, providing post-launch technical support, and performing software Quality Assurance (QA). Adept at database management, API integration, and leveraging modern AI development tools to accelerate workflow efficiency.

SKILLS

Programming Languages: PHP, JavaScript, C#, Python, Java, C++, HTML, CSS, SQL
Frameworks and Technologies: Laravel, React.js, CodeIgniter 4, .NET Core / Windows Forms, MySQL, Tailwind CSS, Bootstrap
Core Concepts: Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), Relational Database Management (RDBMS), API Integration, Game QA & Testing, Web Security
Tools and Platforms: Git, GitHub, VS Code, Figma, Vercel, Cloudflare, Composer
AI Tools: Claude, Cursor, ChatGPT — experienced in leveraging AI tools to accelerate development and improve productivity
Additional Skills: UI/UX Design, Problem Solving, Team Collaboration, Technical Support, Communication, Adaptability

EXPERIENCE

Technical Support & Full-Stack Developer (Intern) **March 2026 – Present**
One Health (Web-Based Immunization System) – Hybrid

- Designed and co-developed the full-stack architecture using Laravel, React.js, and MySQL to digitize immunization record-tracking and health history logging.
- Successfully launched and deployed the system to production at **onehealth.my**, serving as a deployed public platform.
- Provided ongoing post-launch technical support, diagnosing client-reported database queries, server issues, and frontend UI glitches.
- Implemented feature updates and performance optimizations to improve application stability and database efficiency.

Game QA Tester **2025 – 2026**
Golden Tides (Psychedelic Games)

- Conducted playtesting and quality assurance assessments for the pirate-themed PC adventure MOBA *Golden Tides*.
- Identified, documented, and reported functional gameplay bugs, network synchronization issues, UI glitches, and balancing flaws.
- Collaborated with community and developer teams to submit detailed reproduction steps, verify bug fixes, and regression test updates.

PROJECTS

Nihituwan (Property and Unit Management System)
Tech Stack: PHP, CodeIgniter 4, MySQL, Composer, Bootstrap

- Developed a web platform for managing real estate properties, individual residential units, and tenant directories.
- Implemented secure user workflows including registration, login, email verification, and role-based access controls (Admin vs. Tenant).
- Structured a secure backend MVC architecture following CodeIgniter 4 standards and managed dependencies with Composer.

Puhon Retail Management (Desktop POS & Inventory System)
Tech Stack: C#, Windows Forms, .NET Framework

- Developed a desktop Point of Sale (POS) and inventory management system for Puhon By Verse using C# and WinForms.
- Created secure authentication panels (Login forms) and database operations to manage product catalogs and retail transactions.
- Designed the user interface in WinForms, ensuring intuitive item registry and billing checkout flows.

Black Ink (Art Shop Ordering and Inventory Website)
Tech Stack: HTML, CSS, JavaScript

- Built a responsive frontend web application for listing art supplies and tracking shop orders during initial web development studies.
- Designed clean product catalog listings, shopping cart updates, and item search filters.

EDUCATION

Bachelor of Science in Information Technology **Expected September 2026**
Cavite State University – Silang Campus

- Core Coursework: Software Engineering, Database Systems, Computer Networks, Object-Oriented Programming (OOP)

Senior High School Graduate **Graduated 2022**
Olivarez College
